## Did you know...

- Colorectal Cancer can be prevented.
- Most colon or rectal cancers occur in men and women who are 50 or older.
- Colorectal Cancer is the 3rd most commonly diagnosed cancer, excluding skin cancer, in both men and women in the U.S.
- Colorectal Cancer continues to be a leading cause of cancer-related deaths. However the mortality rate has been dropping for more than 20 years, partly due to advanced screenings.
- Jackson County Health Department is offering Colorectal Screening Kits to people who qualify, beginning October 2nd, 2017
- FIT test uses antibodies to detect blood in the stool.
- Resources will be available for follow up if needed
