### ONE DEATH & THIRTY-SIX NEW COVID-19 CASES IN JACKSON COUNTY

Jackson County Health Department sadly announces the death of a male in his seventies related to COVID-19. The thoughts of public health staff are with his loved ones.

The Health Department was notified in the past 24 hours of 36 Jackson County residents having contracted COVID-19. The individuals are as follows:

- Female – one under ten, two teens, eight in their twenties, one in her thirties, two in their fifties, two in their sixties, and one in her seventies;
- Male – one preteen, three teens, five in their twenties, four in their thirties, one in his forties, three in their sixties, one in his seventies, and one in his nineties.

415 active cases are currently being managed. To date, there have been 2,299 cases in the county, including 29 related deaths. Thirty-five individuals were released from isolation, in accordance with CDC guidelines, bringing the total released to 1,855 individuals.

The entire State will be placed on [Tier 3 mitigation measures](#) starting Friday. These measures are aimed at reducing potential exposure to COVID-19 in various types of businesses. In Jackson County, over the past six weeks the number of weekly positive cases increased over 1,100%. The number of COVID patients in hospitals locally is now at a record-high, which has negative cascading effects throughout local healthcare systems. One out of every four hospital beds in Illinois is currently occupied by a COVID patient. Bart Hagston, Public Health Administrator, states “We are not asking you to follow the mitigation measures because the government requests so. We are asking the mitigation measures be followed because right now, at this critical time, your community needs you to do so.”

Residents of, and visitors to, Jackson County should immediately and consistently take the following actions:

- 1) Stay home as much as possible. Only go out for work or essential items, if possible.
- 2) Avoid parties and gatherings of all sizes - crowds are an ideal environment for spreading COVID-19.
- 3) Keep at least 6ft of space between yourself and others as much as possible.
- 4) Wear a face mask when around others. The latest research shows cloth masks protect the wearer, as well as others.
- 5) Stay home if you are sick, even if you only have mild symptoms. Get tested. Self-isolate while awaiting test results. Stay home when placed on isolation or quarantine.

6) Workplaces should follow all guidance published by IDPH and DCEO, as well as the Restore Illinois Resurgence Mitigations.

7) Return calls to public health officials and follow their instructions.

If you have a fever, cough, difficulty breathing, fatigue, muscle aches, loss of taste or smell, nausea, diarrhea, or other symptoms, call your health care provider for further guidance. Two providers are conducting COVID-19 testing in Jackson County: Call either Southern Illinois Healthcare (SIH) at 1-844-988-7800; or Shawnee Health Service at 618-519-9200.
